

Executive Biography

Louis Kim

Global Head & General Manager
Immersive Computing
HP Inc.

Louis Kim is the Global Head & General Manager of HP Inc.'s Immersive Computing team, the group that developed the award-winning Sprout by HP 3D projective computing platform and the Fitstation by HP 3D scanning customized footwear platform.

Louis's HP career has spanned product and business management and R&D, with an emphasis on new category creation. Louis has worked in both consumer and commercial PCs, handhelds, consumer print and large format printing, with postings in multiple geographies. Beyond his GBU experience, Louis led the Americas region P&L for Workstations, education and mobility.

He holds a Bachelor of Science from Brown University and an MBA from Yale University.

Louis is based in San Diego, California.
